

Preparing Global Citizens and Respecting Diversity

Learning About Self and Others: Mirrors, Windows, and DOORS

CREATE a sketch of a global issue. Show how others across the globe are caring for or doing something that also matters to you. What needs do humans have that are universal? What are some unique ways we meet those needs and celebrate diversity?

SKETCH HERE.

PRESENT your sketch and explain the global issue. Did you address access to clean water, enough nutritious food, preparing children for the future, and living without fear? How are the issues similar to and different from those that others who live across the globe are facing?

RESPOND to the global issues presented by others and learn more about what inspired their sketches. Find and discuss patterns, similarities, and differences.

CONNECT the discussion to other things you want to learn about the world. How can you learn more about the cultural experiences and traditions that are followed in your community and across the globe?
